## Kia 3.0 K Logo – Steering Wheel Emblem

### **Overview**

In these instructions, we are going to explain how to install your Kia 3.0 K Logo Steering Wheel Emblem

### **Tools Needed:**

- Small flat head screwdriver

### **Instructions**

Removal:

1. There are 6 tabs holding the stock emblem in place. You only need to get 1 or 2 of them started in order to get the emblem out.

2. Start with your flat head screwdriver pushing down on the top three tabs. We recommend starting with the center tab. You want to push down towards the floorboard of the vehicle while simultaneously pulling the emblem/screwdriver towards you. This will take a bit of force and will slowly start to wiggle out.

3. Once you have pushed them down and have begun getting the emblem away from the steering wheel, it should look something like this.

4. At this point, it should be easy to pull it away from the stock location.

**Installation:**

5. Installing the new emblem is simple. Just remove the backing from the supplied 3M adhesive and affix it into position.

6. Enjoy your new emblems!
