EPSRC
Engineering and Physical Sciences
Research Council

A hands-on workshop combining online materials and easy-to-use tools to facilitate students' and teachers' use of video in teaching and learning activities. Free to attend, refreshments provided.

Morning: Overview

Background to development of the tools; teacher and student perspectives how they can be used; review of sources and types of data, materials collections that could be incorporated into teaching and learning practice.

Afternoon: Make Your Own!

Participants will be supported in making a simple video-based page for use in their own teaching, either drawing on public sources, or on their own data.

Plenary

A review of what has been achieved, considering how best to draw on available resources, to use video to engage students in analysis and reflection, and embed this in participants' own practice.

Using online videos and user-generated content to create engaging tools supporting analysis and reflection. Leave the workshop with a new tool to use in your own teaching!
