## Six D.O.G.S

Six Dogs is the favorite place to hang out for fans of the underground scene. This highly avant garde locale, situated in the business centre of Athens, is actually a day/all night cultural centre which can host live gigs, performances, exhibitions, shows and parties. Open from 10 a.m. until late, with free Wi Fi, a cool garden for the summer months and reasonable prices. The cafe and bar are popular for the interesting cocktails and drinks and the menu is based on seasonal produce. Ice teas, homemade desserts, bagels, soups, draught beers, specially blended vodkas and much more, in a laid back space.

# The Art Foundation (TAF)

An art gallery, bar, café and night club all in one, Metamatic:taf provides a platform for all possible creative ideas and initiatives, even the craziest ones. In a sense, this establishment is the heart of the new Athens. Since 2009, it has been located in a decrepit building in the Monastiraki district, and is a beehive of activity seven days a week. Taf is a venue for exhibitions, concerts, literary readings, theatre and dance performances, serving as both a vibrant cultural centre and a rendezvous point.

## School Pizza Bar

We were schooled—but in the most flavorful way. We were in School Pizza Bar, a classroom-themed restaurant that serves up Italy's best, ready to enjoy pizza. But where was the sauce? We hailed the waiter, ready to suggest an Introduction to Cookery class to the chef. We were taught a culinary lesson as he explained to us that the restaurant's signature pizza is named white because, instead of the classic tomato sauce, its crust is covered with truffle oil. Humbled, we resumed our knives and forks and dug into the gourmet treat that comes topped with mozzarella, parmesan and arugula. Drop by here anytime and tell us more tales out of School Pizza Bar!

# DaVinci Gelato

The tradition of Italian gelato is ancient and has an importance recognized throughout the world. In spite of the challenges this heritage has evolved and been handed down through the centuries with continuity and persistence right up to our times. At Da Vinci they use fresh milk and only Greek products. All recipes are based on authentic Italian recipes. They only use fresh ingredients, without fat, preservatives or other additives or dyes, which makes it super tasteful and healthy.

## Ta Karamanlidika

Each mouthful burst with flavor. Spices and cold meats and vine leaves stuffed with rice, served with yogurt. I hardly spoke throughout the meal, except to mumble "this is amazing" and "this is so delicious". Judging by the perplexed looks on the faces of other patrons, tourists haven't caught on to this gem yet. The restaurant has a selection of cured meats that hang from hooks on the ceiling, casting a red glow around and stimulating the appetite. This spot is definitely worth a visit.
