- a) Literature
- b) Chemistry
- c) Biology
- d) Medicine

8- Read the following passage, then answer the questions:

There are many forms of pollution. You can smell air pollution which comes from cars and factories, and you can see light pollution at night. Dirty rivers are caused by water pollution. Alarms and car horns cause noise pollution every day.

However, some forms of pollution are not obvious. Scientists think that we can be ill because of pollution in our homes. When we make our homes warmer or cooler, this often causes pollution which is bad for us. Gas that comes from cookers, paint and some furniture can also make us ill. Scientists think that more and more people will become ill from pollution in their homes next year in Europe. That is why scientists are working on ways to avoid such problems in the future.

1. One of the reasons of pollution at home is -----.

- a) doors
- b) refrigerator
- c) cookers
- d) clothes

2. Pollution outside home is more dangerous than pollution inside home. Do you agree? Why? Why not?

3. In your own words, suggest solutions for decreasing water pollution.
